

## WIJI APP : The new Android & IOS mobile App

### 3 main features:

- Configuration of sensors and loggers in v2.ijitrack.com
- Visualization of the last data
- Alarm management
- Photo of your installation sites to easily found them later

### Quick integration in Ijitrack

Quickly configure your sensor by scanning the QR code of the product label. Edit the group it belongs. Then thanks to your mobile GPS you can place it on the map.

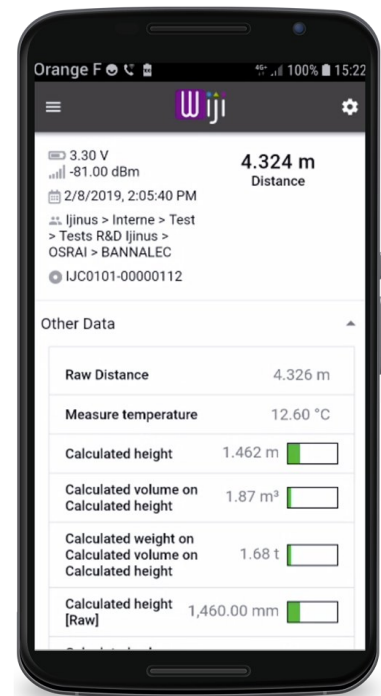

### Data visualization

In addition to quickly adding sensors to your Ijitrack account, the App displays, among other things, the latest data sent by the sensors, the alarms you have configured, the pictures taken during the installation, etc. ...

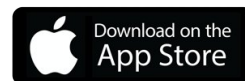

### Real time alarm notifications from Ijitrack

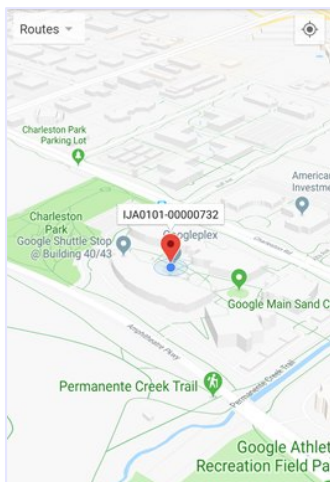

Alarms appear in real time, even if the application is closed. You manage the alerts as under the web monitoring platform Ijitrack

Download the App freely from the App Store & Google Play
